

Key Benefits

* Based on LCD Sales Revenue ** Source : DisplaySearch 2011.1Q LFD Market Report

Configure each display for maximum impact

As leader in the visual display market, Samsung understands how important it is to communicate a clear and concise message. That's why Samsung has developed a full line up of customizable LFDs that can be configured to meet your specific business requirements. The Samsung LFD solution is tailor-made to meet the highest standards of almost any business through its slim design, wide range of screen sizes and easy installation, along with paralleled support to help you make the most of your investment for maximum impact. The reliability and energy efficiency of the LFDs ensures a cost-efficient solution that will require minimal maintenance.

Implement the solution that puts the planet first

As a leading LFD manufacturer, Samsung is committed to responsible production and especially disposal of all of its products. From very early on, Samsung has implemented environmentally friendly processes and technologies to create cost-effective solutions that were gentle on the planet. Featuring advanced Energy Saving and Eco-operation modes, the Samsung LFDs provide professional display solutions that put the PlanetFirst™. For example, the LED lineup consumes 30% less energy than conventional CCFL displays and meets the demands for lower CO2 emissions to be ENERGY STAR compliant.

Cut costs and run a more efficient campaign

Delivering a cost-effective large display solution is a key part of Samsung's LFD value proposition. The Samsung LFD is a highly customizable, modular solution that can be designed with fit with your unique environment in a cost-effective manner. This eliminates the one-size-fits-all solution so that the LFDs are specifically tailored for every application, saving you time and money. The energy-efficient features also allow businesses to save on power consumption, even while operating their displays for longer periods of time. In addition, the LFDs are easy to install and are extremely reliable to help reduce maintenance costs and frequent repairs.

Drive your business at a scale
that's larger-than-life

Big ideas need a big platform

Samsung's new line of large format displays (LFD) command the world's stage. Only Samsung has the experience and innovative technology to deliver a fully integrated LFD solution to deliver your message and bring your vision to life on the big screen. An unrivaled combination of design and integration expertise, high-quality core professional display and audio systems technologies, and experienced professionals make it all happen.

As the world's leading display brand, you can be confident knowing that Samsung has the expertise, reliability, and customizable solutions to meet your business objectives. Samsung's team of specialists has the proven experience and global reach to implement an end-to-end large screen solution for you—no matter where you are in the world. With expert guidance and supervision from the earliest planning stages through full-scale implementation and support services down the road, Samsung can deliver a cost-effective and efficient solution that can grow with your company.

Shopping Mall / Retail Shop

Create excitement to differentiate your message

Capturing the attention of busy shoppers is paramount for any retail-based business. And for an environment such as a shopping mall, the competition increases as does the need to communicate a differentiated message. Whether it's strictly informational or marketing a specific offer or promotion, Samsung's LFDs will display your message in a bold and eye-catching manner. Designed to communicate larger-than-life messages, the LFD will ensure that consumers will stop and pay attention without becoming a distraction or an eye sore.

“After installing the Samsung LFDs I’ve noticed a significant increase in foot traffic into my store. The displays are great for communicating our daily deals and upcoming sales.”

Transportation Terminals

Update your passengers on a real-time basis

The heavy demands levied by today's commuters will only increase with time, and you need a solution that will allow you to manage their needs and grow to meet future volumes and complexity. As consumers rush into busy airports and bus terminals, they need to quickly and clearly identify the information most relevant to them. The Samsung LFD has the ability to cut through the clutter with a high-resolution display that is energy efficient, lightweight, and easy to install.

“My job is to make sure that our passengers are provided with the most accurate and up-to-date information possible. The Samsung LFDs help us to quickly make any updates on the fly so our passengers stay informed.”

Restaurant / QSR

Implement a display solution that keeps up with your business

Whether you're running a quick service or casual dining restaurant, Samsung's LFDs will help you prominently display key customer information like menu items or promotions and discounts. Menu items in many restaurants can change on a monthly, weekly or even daily basis so utilizing a flexible display solution that's cost effective is important. The LFD helps to streamline operational processes by delivering a display that can be quickly and easily updated from a single interface.

“I’ve noticed that ever since we installed the Samsung LFDs the check out line has been moving much faster. The high-visibility display makes it easier for our customers to figure out what they want before they reach the cash register.”

Control Room

Oversee the landscape for a safer environment

The technology driving today's transportation industry requires leading-edge management strategies to monitor, control, manipulate and improve airplane flight patterns. The Samsung LFD is a high-performance solution that offers low maintenance, high reliability and complete display flexibility through easy installation. The displays operate reliably in a 24/7 environment, with long-life, low-maintenance components. The LFDs also delivers high quality video display to ensure an ergonomic work environment for the people operating your traffic management system.

“As someone who works in a traffic control room, you need to be alert at all times. The Samsung LFDs help us to keep a bird's eye view on the entire sky ensuring that every airplane is where it's supposed to be.”

SAMSUNG

Differentiate your business with brilliant, high-impact images

Samsung has taken its expertise in visual displays and has applied it to its new lineup of LED Large Format Displays (LFD). These LFDs leverage the most cutting-edge technology and offer the latest in advanced features available today. Featuring all the advantages of LED backlighting, the Samsung ME Series produces crisp images with accurate color representation, which is extremely critical when displaying large format content. Looking beyond the display, the Samsung ME Series delivers a business solution that is aligned with your business needs. For starters, the ME Series consumes less energy than conventional large format displays built with CCFL technology. The ME Series is also environmentally friendly to complement your business's green strategy. And the slimmer and light-weight design enables a more efficient use of space and allows the ME Series to be configured based on the application, not the other way around.

ME Series

Display Type	46"
Resolution	1920 x 1080 (16:9)
Inch Option	40/46/55
Key Features	Eco Friendly
	Slim & Light
	Built in Contents Player

* Please visit the website to verify detail specifications

Key Features

Slim & Light Weight

Build a viewing environment with higher impact

The slim and lightweight design of the Samsung ME Series delivers a flexible and more customizable solution to better suit your business needs. The ME Series is 77% thinner than large format displays that use CCFL, allowing you to create more space between the LFD and viewer. The lightweight design also enables easier installation and a wider range of applications with less support materials.

	Weight	Set	12.5kg
		Package	16.6kg
	VESA	400 x 400mm	

Low Power & Eco Friendly

Cut operational costs while protecting the environment
Identifying gaps in operational processes is a critical aspect of running a profitable business. The Samsung ME Series can help to close some of those gaps by delivering a cost-effective solution that's also gentle on the planet. The LED technology driving the LFD consumes less energy than conventional CCFL-based large format displays and is lower on CO2 emissions.

Built-in Contents Player

Add variety and flexibility to the content you display

The Samsung ME Series are designed with a built-in content player for greater display capabilities. So in addition to the content on the built-in player, the ME Series can display content from MagicInfo-i Lite, videos, images, music and even documents like PPT files. Since the ME Series already comes equipped with a content player, there's no need to purchase additional software or equipment, or even a PC connection.

* This dimension is applicable to ME55A.

SAMSUNG

Deliver the benefits of a large format display to your business

Built using the industry-standard CCFL technology, the Samsung CCFL Large Format Display (LFD) lineup provides a solid and reliable solution to meet your large format display needs. The DX Series produces superior picture quality with a higher contrast ratio and superb image brightness. The result is a display that creates vibrant and highly visible images that's also extremely cost efficient due to low maintenance and strong reliability. To provide you with even greater convenience and versatility, the Samsung DX Series is built with a wide range of connectivity features. The display is also much lighter and thinner than the competition so shipping and installation is easier and less costly. Plus, the built-in speakers allow you to complement your video message with audio without having to purchase additional equipment and figuring out how and where to install them.

DX Series

Display Type	46"
Resolution	1920 x 1080 (16:9)
Inch Option	40/46/55/70/82
Key Features	High Reliability
	Best Picture Quality
	High Performance

* Please visit the website to verify detail specifications

Key Features

Best Picture Quality

Communicate your message in a bright new way
As one of the brightest displays on the market today, Samsung DX Series is a high-impact display that will give your message the attention it deserves. Built with the same industry-leading imaging technology Samsung uses with its TVs, such as superior brightness levels, the DX Series produces images that are more vibrant and realistic than any other large format display in its class.

Various Connectivity

Expand the variety of content you deliver to your audience
The Samsung DX Series enables businesses to access a wider range of digital content for a more immersive and engaging user experience with its comprehensive connectivity options. With the DX Series, you have the ability to connect PCs and other compatible digital devices to display the content that's most relevant for your audience. The Slide in Module (SIM) design allows for customers with various needs to customize their content based on local demand. In addition, MagicInfo-i helps to streamline content management from almost any location.

		Package	25.7kg
	VESA	600 x 400mm	

24-hour Reliability

Leverage the benefits of greater reliability
The Samsung DX Series offers enhanced operational reliability for greater peace of mind. The Samsung DX Series utilizes innovative cooling technologies to improve heat dissipation while lowering internal temperatures. That allows the LFD to operate efficiently and consistently over longer periods of time without costly servicing or maintenance.

More Standard Features

Benefit from more standard features and accessories
Unlike its competition, the Samsung DX Series boasts a slim and light-weight design. That allows for greater flexibility and opens up a whole new world of options for customized installation applications. The DX Series also offers a wider range of proprietary features that comes standard like built-in speakers and digital out port, than any other models in its class. Plus, the DX Series' size and weight facilitates easier installation for almost anyone.

SAMSUNG

Break through with a totally immersive viewing environment

Utilizing the latest in video display technology, the Samsung UD LFD is opening new opportunities for large format video walls and revolutionizing the industry. Among the variety of innovative new features is the super narrow bezel. Bezel thickness is the most important factor when creating a video wall. The slimmest bezel on the UD LFD lineup is a mere 5.5mm in order to focus the attention of the viewer to the content on the screen and not be distracted by black frames.

The Samsung UD Series also produces images with Full HD picture quality and 1920x1080 resolution, which becomes even more critical when producing larger-than-life images. For even greater cost savings, the UD Series is easy to install and can be customized to fit in a variety of locations and use for a number of applications.

UD Series

Display Type	55"
Resolution	1920 x 1080 (16:9)
Inch Option	55"
Key Features	Super Narrow Bezel
	High Resolution & Brightness
	Easy Installation Solution

* Please visit the website to verify detail specifications

Key Features

Super Narrow Bezel

See images as they were meant to be seen

The super narrow bezel feature of the Samsung UD Series enables your content to shine through without any distractions or obstructions. At a mere 5.5mm, the thinnest bezel of the lineup allows you to create a nearly seamless viewing experience that can be as big as your imagination.

Easy Installation

Create a custom solution with easy installation

With easy-to-follow installation instructions and our installation specialists, you can create and configure a customized video wall solution with the Samsung UD Series. It also comes equipped with a range of versatile installation accessories such as MID and wall mount brackets for even greater convenience. Samsung has helped businesses around the world to create video wall solutions that are custom-made for their unique environment. This modular approach also enables Samsung to deliver the solution in a cost-effective manner.

		Package	33kg
	VESA	600 x 400mm	

High Resolution

Present your content in Full HD

Leveraging the same imaging technology that's used in Samsung TVs, the UD Series produces images in Full HD for crystal-clear images at a larger-than-life scale. That means you don't have to worry about the quality of your images when displayed at much larger sizes. Just as long as the original image is high resolution, you can display content with full confidence.

Eco-friendly LED Back Light Unit (BLU)

See how the eco-friendly LED BLU can make all the difference

The Samsung UD55A is powered by Samsung's eco-friendly LED backlight unit technology to produce clear picture quality with high contrast levels, providing clear images and improved color saturation. But what's more, the Samsung LED BLU is gentler on the planet compared to other display technologies and is free of harmful materials such as mercury and halogen, which makes recycling much safer.

SAMSUNG

SAMSUNG

Draw the attention of your audience and increase participation

Creating the ultimate learning environment is now possible with the visual benefits of a large screen display that delivers the functionality and power of a touch screen computer. The Samsung e-Board is the perfect solution for a wide variety of teaching and presentation challenges. The e-Board is an interactive whiteboard that lets you deliver dynamic lessons, write notes in digital ink, and save your work—all with the simple touch of a finger. At 65 inches, the highly visible display can be clearly viewed at wide angles so everyone in the room has the same experience. The images produced by the Full HD e-Board make the lessons more impactful and improve class participation and attention span. The e-Board is also built with two 15W speakers so you can run educational videos and other types of AV content without the need of any additional equipment.

e-Board

Key Features

Touch Screen

Provide an intuitive way to access content

The Samsung e-Board is designed with a Touch Screen that allows users to access content by touching the screen directly with either the supplied Touch Pen or their finger. The Touch Pen enables a more comfortable and accurate writing experience. This natural and intuitive approach creates an interactive learning experience that's also more engaging for both the teacher and student.

Classroom Management

Run a more efficient and streamlined classroom

Maintaining an efficient classroom environment is essential to the learning process. The Samsung e-Board delivers that goal through interactive learning and all the advantages of a digitally integrated classroom. Now, teachers can share what's on their desktop with their students and create customized lessons, quickly easily. This provides students with a more focused learning environment that's more engaging and less distracting. Plus, with a wider viewing angle, everyone in the room can see the content on the screen with perfect clarity for better classroom management.

Optional Slide in PC

Increase content versatility, quickly and easily

With the optional Slide in PC (SIP) feature, the Samsung e-Board provides users with the ability to customize their e-Board solution to suit their unique needs. The SIP option expands the versatility of the content being displayed and provides users to easily update content on a regular basis by sliding the PC in and out of the display without having to dismantle the unit from the wall.

Software for Education

Teach with greater confidence and impact

Creating a conducive learning environment begins with the ease-of-use of the Samsung e-Board. The e-Board contains a software package with an intuitive user interface so that everyone from teachers to students can start learning right away. The package includes a number of common usability features such as a "drag and drop" capability, writing and drawing programs, and the ability to save your work when you're done.

SAMSUNG

Make your message stand out

Samsung UT series 46"/55"

Get your audience's attention with super narrow bezel

Samsung UT Series a super-narrow bezel that enables them to create a seamless and super-effective video wall. At only 5.3mm (55") thickness (bezel to bezel), Samsung UT Series LFD dramatically reduce the distance between parts of the image, presenting a more complete and coherent multi-display image and providing a much larger and more effective display area.

On the wall or off the wall, multi-display never looked

Digital Daisy Chain over 100pcs

The inclusion of a DVI-out interface enables content to easily be shared between multiple monitors. By eliminating the need to purchase a separate video signal distributor, this creates a simple and cost-effective way of establishing a connected multi-display environment that can incorporate up to 100 individual monitors.

Specialized Samsung stand

The Samsung ID Stand Kit enables multiple Samsung UT Series LFD to be stacked and installed in a variety of ways, allowing you to create a video wall that has maximum impact in any environment, with or without a wall!

Embedded video wall

Up to 10 x 10 Samsung UT Series LFD units can be combined to create a high impact video wall. With easy OSD set-up and no need to purchase additional hardware, Samsung UT Series LFD are all-in-one solutions that make creating an effective multi-display environment as easy as can be.

Versatile wall-mountable option

Samsung UT Series a versatile wall-mountable option that enables monitors to be added to and removed from the video wall with unrivaled simplicity. LFD can be detached from anywhere in the video wall, even the middle, without having to remove other monitors.

High-tech hardware, superior software, complete connectivity

Smart External Sensor option

The detachable Ambient Brightness sensor enables effective multi-display control. By assessing the ambient light level of the area surrounding the display, on-screen brightness is automatically adjusted accordingly. The sensor can be placed either on the side, on the upper, on the lower surface of the display, Wherever you want.

Achieve the perfect balance

To ensure that the image displayed on-screen is always correctly colored, Samsung UT Series LFD feature Automatic Color Calibration. This intelligent feature enables White Balance to be adjusted on the video wall as a whole when multiple monitors are in use.

Powerful built-in PC

Samsung UT Series LFD feature a powerful built-in PC that is designed for long-term use in extreme environments. Equipped with an industrial strength HDD and with an advanced EWF (Enhanced Write Filter), they ensure a long lifetime of reliability and readability.

Display Port interface

The inclusion of a Display Port (DP) interface enables the creation of a completely connected digital display environment and ensures that the highest quality images are transmitted with precision.

Long range remote control

The advantage of the RJ45 interface is that it enables long distance remote control via LAN, allowing you to operate a more efficient and effective multi-display network.

Various offers to customer's needs 460UT(n)-B

The Samsung UT Series features a range of monitors that are designed to suit any budget. Whether you choose one designed for heavy use or light use, from the top of the range or our economic model, one thing you can be sure of is that you've chosen an extremely cost-effective way of creating the ultimate multi-display environment.

SAMSUNG

Samsung Syncmaster 400/460 UX(n)-2 LFD monitors

Professional multi-display perfection

The Samsung 400/460 UX(n)-2 LFD monitors invite your audience to enjoy the bigger picture 24/7. Their 11mm bezel enables them to create a seamless multi-display format, and with Full HD resolution, high readability and reliability, embedded stereo speakers, and 40GB HDD they put more of your message where people can see it.

Slim, stylish and sensational

With their incredible 11mm narrow bezel, the Samsung 400/460 UX(n)-2 LFD monitors are designed to combine to create a sensational multi-display environment that is seamless, stylish, and second to none.

Reliability and readability

The Samsung 400/460 UX(n)-2's DID panel guarantees exceptional readability and reliability. With lower operating temperature, higher brightness, and effective anti-reflection and dust features, the panel performs to perfection in any environment.

Perfect presentation all day, every day

Designed to provide a powerful, professional visual presence, the Samsung 400/460 UX(n)-2 LFD monitors guarantee information is presented to perfection 24 hours a day, 7 days a week for the duration of their extended lifetime.

Dynamic Full HD display

By displaying Full HD resolution images, the Samsung 400/460 UX(n)-2 LFD monitors present images and information with unrivalled depth of color, detail, and readability, ensuring that whatever they display is conveyed with complete clarity.

Giving voice to your message

With powerful 10W embedded stereo speakers, the Samsung 400/460 UX(n)-2 can convey your message on a multi-sensory level. Eliminating outlay on separate speakers, they enable you to save money and create an efficient, effective display.

Embedded DVI output saves time and money

With the inclusion of a DVI signal output terminal, the need for a separate video distributor is eliminated, making the 400/460 UX(n)-2 easier to install and more cost-effective either in a single screen or multiple screen format.

More storage, more power to your message

To meet your display needs today, and in the future, the 400/460 UX(n)-2 are equipped with a 40GB internal HDD. This enables them to store and play more high quality HD content and give more power to your message.

Extreme energy efficiency

Through the application of innovative power-saving measures, the 400/460 UX(n)-2 are up to 70% more energy efficient than similar LFD monitors, thus reducing operating costs and total cost of ownership, making them ideal for continuous use.

Samsung LFD (Large Format Display) Monitor

LFD M080BL E01 HQ-WW

Project a professional image

Your LFD can be your first point of contact with your audience, and the Samsung SyncMaster P63F/P63Fn/P63FP is sure to leave a good first impression. Our Set Back Box (SBB) feature allows for effective expandability while the built-in network module provides for easier control and overall management. Plus, the Full HD capabilities produce clear and high-quality images you've come to expect from a Samsung LFD.

Key Features

■ Stunning Full HD

Samsung LFDs' Full HD 1080p (1920x1080) technology produces realistic images that are clear and crisp. And at 1080p, the LFD delivers the highest resolution digital images available today.

■ Powerful functionality

With the SBB option, you can take advantage of a wide variety of functional support whether it's through your network or TV tuner. As an added convenience, the SBB can be attached to the back side of the LFD monitor.

■ Enhanced networking capabilities

The built-in network module on the LFD monitor provides you with another layer of convenience. The module allows for easy networking for greater efficiency and overall performance.

■ Increased connectivity

The LFD delivers an increased amount of versatility with its wide variety of connectivity options. From PC to Video inputs, to a convenient remote control, your LFD has the ability to expand with your business needs. The LFD also comes fully-equipped with a High Definition Multimedia Interface (HDMI), allowing you to connect with any compatible digital audio/video source.

■ Exceptional readability

The combination of a high brightness level (1,000cd/m²) and high contrast ratio (10,000:1), the Samsung LFDs deliver brilliantly illuminated colors, ensuring that every image looks its best, indoors and out.

■ Multi-display screen

The multi-display screen (MDC) program enables you to control a variety of different sources through the built-in RS-232C interface. So connecting your Samsung LFD to devices such as a network of PCs allows for an easy exchange of data and information.

■ Impactful wall displays

A video wall processor built into every Samsung LFD allows you to create impressive video walls in configurations from 1 x 5 to 5 x 5.

■ 6-way anti burn-in protection

Protecting your Samsung LFD from burn-in is critical to its longevity. Each LFD provides you with the ability to choose from among six types of anti-burn protection, as well as the time period of each operation.

■ Vertical image capability

Whether the ideal image orientation is vertical or horizontal, the Samsung LFD can be configured to best suit your needs. With the built-in cooling fan, you can now enjoy the same advantages of vertical mounting as horizontal.

Specifications

Model		P63F	P63Fn	P63FP
Panel	Diagonal Size	63"

Samsung New MX series LFD – 320/400/460MX-3

High impact, Low cost of ownership

Providing Full HD resolution at an affordable price, the Samsung New MX-3 series LFD delivers your message with power and precision. The rich, realistic color and deep, dramatic detail of Full HD images creates a high-impact digital display that outperforms analog displays in every way.

Full impact, Full HD

Samsung New MX-3 series LFD 40" and 46" Full HD models naturally attract the eyes and engage the attention. The rich color and dramatic depth of detail contained in the images they display provides the perfect platform for a high visibility, high impact digital display.

Choose the SIM that suits you

The variable PC slot gives you the option to choose the SIM (Slide In Module) network type that suits you. From high-end quad core to low-end media player, Samsung New MX-3 series LFD gives you more choice. (SIM purchase optional)

Extend, Expand

The new Samsung MX-3 Series LFD includes an RJ45 interface and an RS232C interface to facilitate easy and effective multi-display remote control. The RJ45 interface is designed to control multiple monitors over long distances by LAN.

Give your message a voice

With powerful built-in stereo speakers (10W+10W), the Samsung New MX-3 series LFD gets your message across with complete clarity. Eliminating the expense of purchasing separate speakers, the space-saving design creates a high-impact multimedia display.

Professional Display Port interface

The Samsung New MX-3 series LFD's Display Port interface enables high performance (up to WQXGA 10 bits) multi-display control without a distributor over longer distances (2x longer than DVI). Supporting interoperability with DVI, VGA, and HDMI, the Display Port interface helps create the ultimate high-definition digital display experience.

Always on schedule

Samsung MX-3 series LFD feature an intelligent Smart Scheduling feature that enables you to schedule when the monitor is on or off depending on time, date, volume, input source, and even holiday designation. Up to 3 individual schedules can be set and stored for your comfort and convenience.

Change your display

With a smooth swivel, Samsung New MX-3 series LFD pivots through 90 degrees, enabling data to be displayed in either landscape or portrait mode.

imagine greater expansion capabilities

SAMSUNG

SAMSUNG SBB_Set Back Box(Network)

Project a professional image

Your LFD can be your first point of contact with your audience, and the Samsung SyncMaster with our SBB feature is sure to leave a good impression. The SBB feature allows for effective expandability and DTV access while the built-in network module provides for easier control and overall management. And don't forget the clear and high-quality images you've come to expect from our Samsung LFDs.

PC-like performance

For certain models, the Samsung LFD is enabled with Microsoft XP-embedded software, which allows for PC-like performance through your display. And with its ultra-slim design, it makes the most efficient use of the environment.

Wide network performance levels

Depending on your needs, the Samsung LFDs are available with basic and high-end networking capabilities. On the high end, the LFD is built with a 64bit dual core processor, while the basic range uses a 64bit single core processor.

Integrated graphics chipset

Intelligently designed with an ATI RS780 integrated graphics chipset, the Samsung LFD no longer needs a separate graphics card which reduces its overall cost of ownership.

High Definition Multimedia Interface

As an added feature, the Samsung LFD comes fully-equipped with a high-performance High Definition Multimedia Interface (HDMI). This will allow your LFD to connect with any compatible digital audio/video source.

VGA out port

With the convenient VGA out port, your Samsung LFD supports image cloning that can be transmitted to another display in your network.

Convenient DIMM-DDR2 slots

Now offering two DIMM-DDR2 slots, the Samsung LFD boasts faster speeds, higher data bandwidths and convenient upgrading to DDR.

Increased internal performance

With its built-in 40G/80G HDD, the Samsung LFD boasts a greatly enhanced storage capacity and is equipped with a 2.5-inch SATA and PATA storage interface for increased data transfer.

Specification

	High End	Low end
CPU	AMD Athlon X2 Dual-Core	55"
	64-bit Dual Core / 1GHz FSB	S-PVA (DID) 120Hz
